(a) Availability face: $\rho^{(1)}_{4\times1} = 0$
(b) All circuit populations available
$C: 2+2 \to 4$ in block 2
$D: 4\times1 \to 4$ in block 2
block 1 only
parents only
suppressed
(c) Selected accessibility P/S
(d) Block-1 share $r^2/(r^2+Q^2)$
block-1/block-2 decay λ_1/λ_2
overall decay λ_0
